Data Analyst

Dedicated and detail-oriented Data Analyst with over three years of experience in data analysis, reporting, and visualization. Currently pursuing a Master's degree in Data Analytics to further enhance my analytical and technical skills. Passionate about leveraging data to drive strategic decision-making and improve operational efficiency in healthcare.

SKILLS

Technical Skills: SAS, SQL, Google Sheets, Excel, Looker, Tableau, PowerBI, Python, R, MySQL
Data Analysis: Large Dataset Manipulation, Data Visualization, Statistical Analysis, Complex Queries
Project Management: Strategic Planning, Process Improvement, Stakeholder Management, Team Coordination
Communication: Effective Verbal and Written Skills, Presentation Skills, Executive Reporting
Healthcare Operations: Clinical Service Quality, Outcomes Analysis, Efficiency Monitoring, Industry Trend Analysis

WORK EXPERIENCE

Wells Fargo - *Minneapolis, MN*   **Oct. 2024 – Present**
Analytics Consultant
- Analyze and manage risk data, identifying potential areas of value or risk to support strategic initiatives within the Strategic Enterprise Risk Management (SERM) team.
- Execute data transformation processes to source, organize, and format unstructured data, using SQL and other database tools to enhance data usability for comprehensive risk assessments.
- Maintain and troubleshoot large-scale business applications, coordinating root cause analysis, resolving production issues, and documenting workarounds to ensure operational continuity.
- Collaborate with stakeholders to understand their needs, frame issues, and provide solutions, leveraging analytical tools and insights to make informed recommendations.
- Use Agile methodologies and JIRA to track project progress, prioritize tasks, and deliver results in line with corporate objectives and team goals.

BI WorldWide - *Minneapolis, MN*   **Jan. 2024 – Oct. 2024**
Data Analyst
- Conducted quantitative analysis and predictive modeling of healthcare data to support client decision-making.
- Developed detailed reports and visualizations using Power BI, Tableau, and Qlik to communicate complex findings to various stakeholders.
- Collaborated with external data management teams to receive, load, and analyze new data, maintaining data integrity.
- Provided data-driven insights to support strategic initiatives, identifying trends and patterns that informed decision-making.
- Documented processes and results, ensuring clear communication of analytic methods and key decision points.
- Utilized expertise in Microsoft Excel, PowerPoint, and SQL Server for data analysis and reporting.
- Gained familiarity with healthcare terminology such as diagnosis code, CPT, claim ID, DRG, inpatient, and outpatient.

Deloitte - *Minneapolis, MN*   **July 2022 – Jan. 2024**
Data Analyst
- Supported client data integration and managed data transfer processes, ensuring data accuracy and completeness.
- Created detailed reports and presentations for stakeholders, providing insights on operational workflows and key performance metrics.
- Conducted regular data quality checks to ensure the integrity and accuracy of imported data.
- Provided troubleshooting support for data setup issues, resolving problems and ensuring smooth data transitions.
- Assisted with the creation and update of customer and release documentation, ensuring all materials were current, accurate, and comprehensive.
